SECTION- A

I Read the Following passage and answer the questions.

1 x 5 = 5

Among the longest snakes are the python of south - east Asia. Which reaches ten metres and anaconda of South America, which can grow to eight and a half meters. The shortest snake in the world is the thread snake of west Indies which grows to only 12 centimetres.

The long body of a snake includes a tail, but as it is joined to the main part of the body, it cannot be seen from where it begins. The mouth can be opened very wide to swallow prey, and is lined with sharp teeth, some of which may be poisonous fangs. Snakes have a long tongue that is forked at the tip, there is a notch in the upper jaw through which the tongue moves. The tongue takes place of the nose and picks up odours and carries them to an organ inside the mouth known as Jacobson's organ, which detects the odours

I say

open our heart

Like a new flower

Let the hatred in us

Flow away like a stream

Let justice be set in our hearts

Like a stone standing
 Straight and firm
 I have a dream that one day
 People all around the world
 Shall eat from the plate of peace
 and say together
 We shall stay so always
 one day
 a tree will grow high and strong
 in the garden of justice
 And live for ever.
